PHILIP MUIMI

DATA ANALYST | DATA QUALITY

+254 706 413 687 | philipmuimi05@gmail.com | LinkedIn | GitHub

PROFESSIONAL PROFILE

Data analyst with experience in data mining, healthcare-data verification, database management, and analytical support at Gonep Pharmaceuticals. Skilled in Python, SQL, Excel, Power BI, AWS, data cleaning, data visualization, and data interpretation, with foundational knowledge of machine learning and model building. Experienced in translating data requirements into structured datasets, checking records for accuracy and completeness, and preparing information for reporting and operational decisions. Contributed to a hospital-to-patient mapping initiative and prepared datasets supporting funding applications and resource mobilization. Collaborates with team members and stakeholders to clarify information needs and maintain accessible, consistently organized data.

CORE SKILLS

Data quality & preparation: Data collection, web-based research, data cleaning, verification, completeness checks, duplicate awareness, structured data entry, record maintenance

Analysis & reporting: Microsoft Excel, Power BI, data interpretation, dataset organization, basic reporting, documentation, information summarization

Cloud platforms: Amazon Web Services (AWS)

Programming & databases: Python fundamentals, SQL fundamentals, database organization and maintenance, structured data handling

Research & coordination: Online information gathering, source checking, requirements clarification, stakeholder coordination, teamwork, task tracking

Additional technical exposure: Data visualization fundamentals, machine-learning fundamentals, scientific data analysis, computational molecular modelling

PROFESSIONAL EXPERIENCE

Tender Analysis & Application | Bustus Limited | Aug 2025 – Jul 2026

- Reviewed tender opportunities and extracted scope, eligibility criteria, mandatory documents, submission instructions, and deadlines to support application planning.
- Developed requirement checklists from tender documents, giving the team a structured way to review application completeness.
- Compiled and formatted supporting documents, checking information for completeness and consistency before team review.
- Compared company records against tender requirements and flagged missing documents or information requiring clarification.
- Supported the preparation and review of technical and administrative responses using inputs provided by the relevant team.
- Tracked submission deadlines, required documents, and application progress to help the team prioritize outstanding work.
- Researched tender opportunities and summarized relevant requirements for follow-up and application review.
- Maintained organized tender records to support document retrieval and reuse in subsequent applications.

Data & Data Analytics | Gonep Pharmaceuticals | 2026 – Present

- Collect, clean, verify, and structure datasets for internal reporting, research, and operational review.
- Prepare healthcare-facility records for a hospital-locator initiative intended to help users identify nearby health services.
- Organize facility registration, location, ownership, level, bed capacity, operating status, coordinates, and service information into consistent records.
- Review datasets for missing fields, inconsistent entries, and obvious errors, flagging conflicting information for further verification.
- Maintain structured datasets and database records to support information retrieval, traceability, and reuse.
- Research and organize online information into datasets supporting funding research and resource-mobilization activities.
- Collaborate with team members to clarify data requirements and convert collected information into usable records.
- Document data-preparation work and prepare organized outputs for reporting, review, and further analysis.

EDUCATION

Bachelor of Science in Business and Information Technology | Dedan Kimathi University of Technology
